

AI-Powered Asset Management

Empower Businesses with Smarter Assets

Disparate Asset Ecosystem

Is your asset management fragmented across IT, IoT and OT, causing oversight and higher costs?

Inconsistent Asset Data

Do you struggle to capture clean and end-to-end asset data, resulting in discrepancies?

Questionable Asset Health

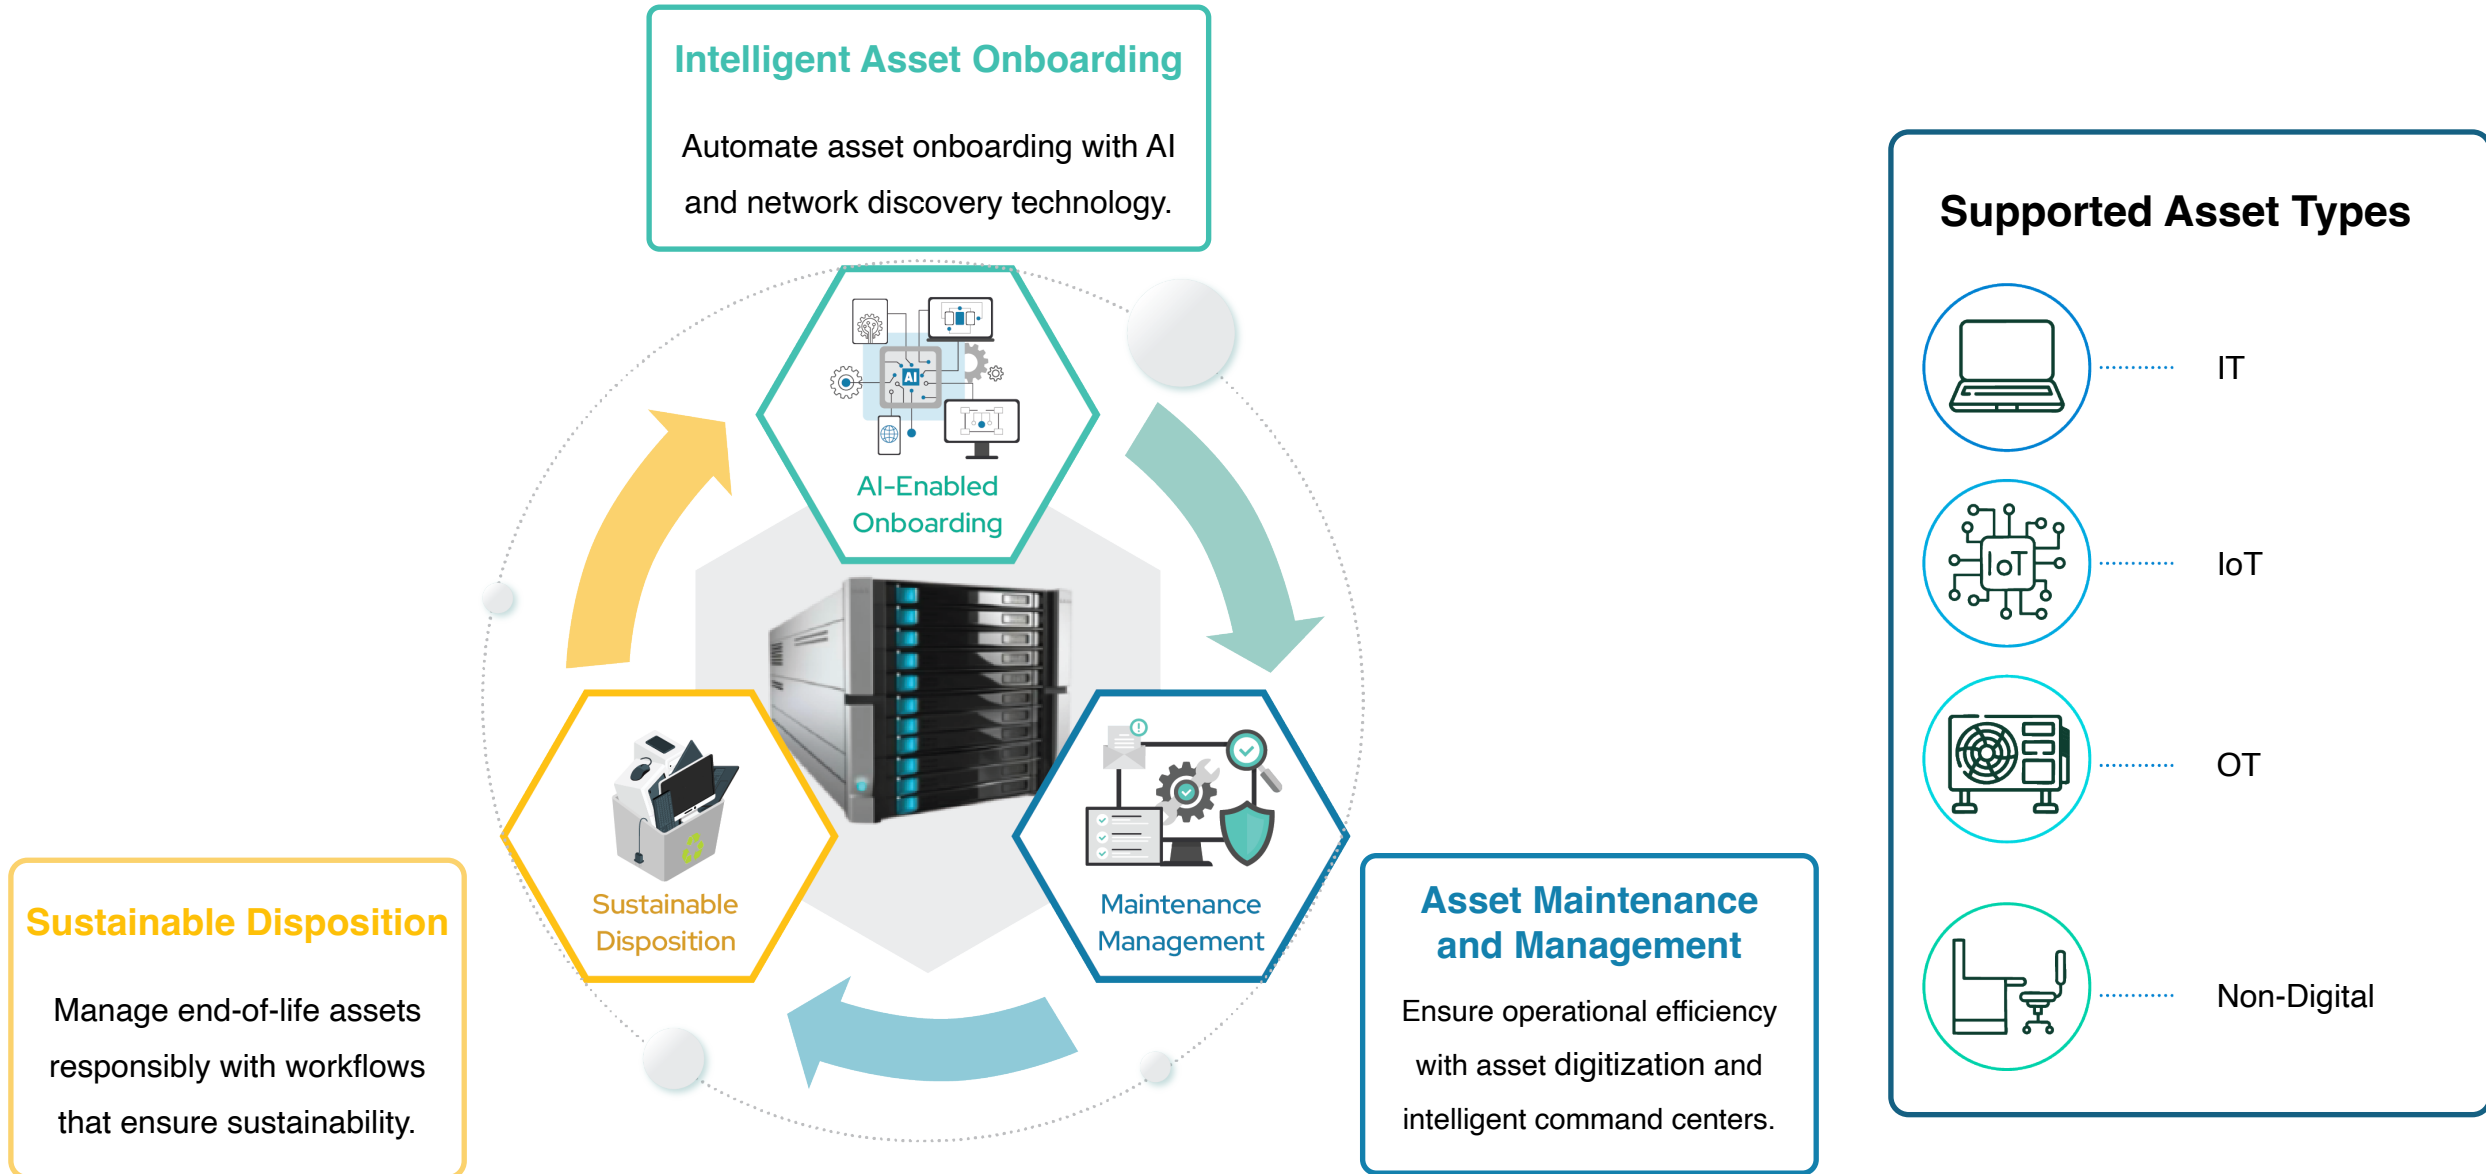

How confident are you about your assets running at optimal performance?

Blind Spots in Asset Operations

Are you in control of all your asset operations and productivity across the portfolio - all at once?

Optima: AI-powered Asset Lifecycle Management

Deployed across 10+ Fortune 500 end-clients.

2M+ Annual Audits Performed

1M+ Assets Managed across Portfolio

Globally Deployed in 50M+ sq. feet.

Trusted Across Key Sectors

MSP

IT Enterprises

Manufacturing Units

Financial Institutes

Retail Chains

The Challenge:

Inaccurate and inefficient asset data collection and lack of centralized tracking hinders visibility.

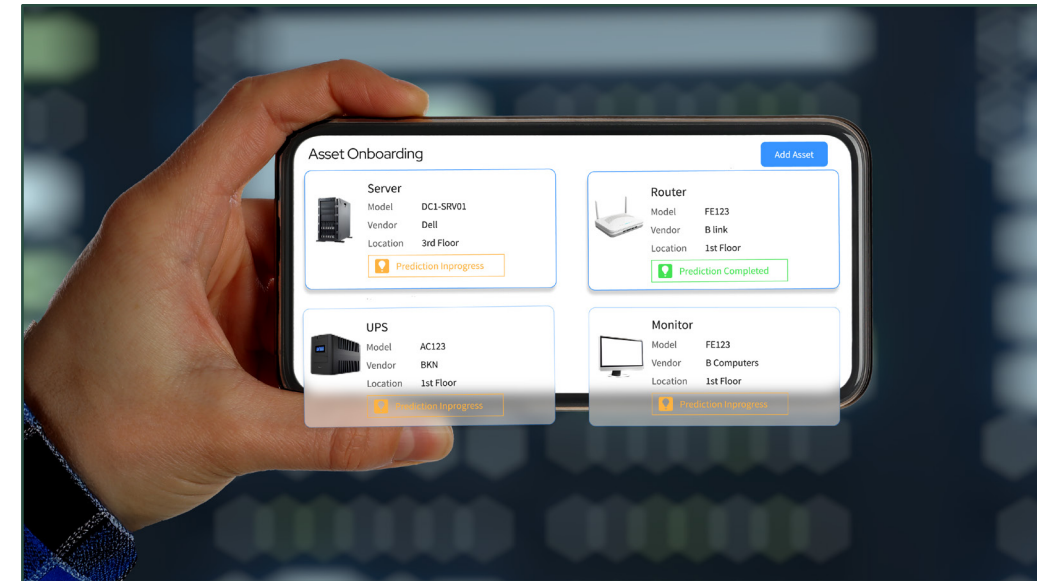

The Solution:

Use AI to capture clean and classified asset data and global tracking of the entire asset portfolio from the very start.

The Persona:

System and IT Admins, Onboarding Teams, and Field Technicians.

The Challenge:

Manual workflows and a break-fix approach, leading to deteriorating asset health and reduced people productivity.

The Solution:

With a proactive approach, Optima monitors asset health in real-time reducing failures before they happen. Automates maintenance workflows — by auto-generating alerts and tickets.

The Persona:

Asset Technicians, Engineers, and Operations Managers

The Challenge:

At the end of asset lifespan, organizations grapple with risking data security, improper disposal, and missed opportunities for resale or recycling.

The Solution:

Identify the right next step for your asset with the help of Optima's health score and insights, track the disposition process, and achieve KPIs to meet ESG goals.

The Persona:

Compliance Officers, and Sustainability Teams

Testimonial

By saving 3 minutes per asset touch, the solution freed up 50k hours of work or 6.25k person-days annually — Allowing for reallocation of on-account resources to focus on other critical aspects of their operations

Client Success Story - IT Hardware Asset Management for JLL Technologies

Challenge	Solution
Fragmented IT asset management – Disconnected systems made tracking and managing IT assets inefficient.	Automatic network discovery and streamlined asset onboarding with AI-driven precision.
Lack of centralized asset tracking – Inconsistent and outdated records reduced visibility and decision-making.	Intelligent Command Center – A single control hub providing complete asset visibility and tracking.
Minimal network bandwidth visibility leading to a reactive approach	Network bandwidth monitoring – Real-time throughput tracking with proactive ticket generation to prevent issues.
Complex IT integrations – Managing assets across multiple platforms was a challenge.	Single pane of glass – Unified view of all asset operations through seamless integrations.

Tangible impact

 100,000 Assets	 22 Offices Global Roll-Out
 ServiceNow Integration	 Intelligent Command Center
